## **DETAILED ACTION**

### ***Specification***

1. A substitute specification of the disclosure and the claims is required pursuant to 37 CFR 1.125(a) because the specification contains markings in both the disclosure and claims. This does not comply with current practice requiring a clean copy and marked version of both the specification and claims. Also the markings in the claims render it difficult to determine the metes and bounds for which patent protection is being sought.

A substitute specification filed under 37 CFR 1.125(a) must only contain subject matter from the original specification and any previously entered amendment under 37 CFR 1.121. If the substitute specification contains additional subject matter not of record, the substitute specification must be filed under 37 CFR 1.125(b) and must be accompanied by: 1) a statement that the substitute specification contains no new matter; and 2) a marked-up copy showing the amendments to be made via the substitute specification relative to the specification at the time the substitute specification is filed.

2. Claims 1-12 are objected to because of the following informalities: the claims are replete with markings rendering it difficult to determine the metes and bounds for which patent protection is being sought. Appropriate correction is required.
